一个简单的基于 DirectShow 的播放器 2 (对话框类)

2013年10月26日 00:44:19 阅读数:3622

上篇文章分析了一个封装DirectShow各种接口的封装类(CDXGraph): 一个简单的基于 DirectShow 的播放器 1(封装类)

本文继续上篇文章,分析一下调用这个封装类(CDXGraph)的对话框类(CSimplePlayerDlg),看看在MFC中如何使用这个类(CDXGraph)。

首先来看看CSimplePlayerDlg这个类的定义,瞧瞧SimplePlayerDlg.h这个头文件。

```
[cpp] 📳 📑
1.
      /* 雷霄骅
2.
      * 中国传媒大学/数字电视技术
3.
      * leixiaohua1020@126.com
4.
5.
6.
     // SimplePlayerDlg.h : header file
7.
     //
8.
9.
      #if !defined(AFX SIMPLEPLAYERDLG H 3599FE35 3322 4CC7 B30B 6D6050C2EDFF INCLUDED )
     #define AFX SIMPLEPLAYERDLG H 3599FE35 3322 4CC7 B30B 6D6050C2EDFF INCLUDED
10.
11.
     #if MSC VER > 1000
12.
13.
      #pragma once
14.
     \#endif // \_MSC\_VER > 1000
15.
16.
      17.
      // CSimplePlayerDlg dialog
18.
19.
      #include <streams.h>
     #include "CDXGraph.h"
20.
21.
22.
      #define SLIDER TIMER 100
23.
24.
      class CSimplePlayerDlg : public CDialog
25.
26.
     // Construction
      public:
27.
28.
       CSimplePlayerDlg(CWnd* pParent = NULL); // standard constructor
29.
         ~CSimplePlayerDlg();
30.
      // Dialog Data
31.
32.
      //{{AFX_DATA(CSimplePlayerDlg)
33.
          enum { IDD = IDD_SIMPLEPLAYER_DIALOG };
34.
      CSliderCtrl mSliderGraph;
35.
         CStatic mVideoWindow;
36.
     //}}AFX_DATA
37.
      // ClassWizard generated virtual function overrides
38.
         //{{AFX VIRTUAL(CSimplePlayerDlg)
39.

40.
         virtual BOOL PreTranslateMessage(MSG* pMsg);
41.
      virtual BOOL DestroyWindow();
42.
43.
         protected:
      virtual void DoDataExchange(CDataExchange* pDX); // DDX/DDV support
44.
45.
          //}}AFX_VIRTUAL
46.
47.
      // Implementation
48.
     protected:
49.
         HICON m_hIcon;
50.
51.
         CDXGraph * mFilterGraph;
                                      // Filter Graph封装
      CString mSourceFile; // 源文件
52.
         UINT
                      mSliderTimer;
                                       // 定时器ID
53.
54.
      //创建Graph
     void CreateGraph(void); // 创建Filter Graph
void DestroyGraph(void); // 析构Filter Graph
55.
56.
         void RestoreFromFullScreen(void);
57.
58.
59.
          // Just for testing..
      HRESULT FindFilterByInterface(REFIID riid, IBaseFilter** ppFilter);
60.
61.
         void ShowVRPropertyPage(void);
62.
63.
          // Generated message map functions
      //{{AFX_MSG(CSimplePlayerDlg)
64.
          virtual BOOL OnInitDialog();
65.
66.
         afx msg void OnPaint();
67.
         afx_msg HCURSOR OnQueryDragIcon();
         //打开
68.
         afx_msg void OnButtonOpen();
69.
         //播放
70.
         afx_msg void OnButtonPlay();
71.
72.
         //暂停
73.
         afx_msg void OnButtonPause();
74.
         //停止
75.
         afx_msg void OnButtonStop();
```

```
afx msg void OnButtonGrab();
77.
           afx msg void OnButtonFullscreen();
78.
       afx msq BOOL OnEraseBkgnd(CDC* pDC);
          afx_msg void OnTimer(UINT nIDEvent);
79.
          afx_msg void OnHScroll(UINT nSBCode, UINT nPos, CScrollBar* pScrollBar);
80.
81.
           afx msg void OnButtonTest();
82.
         //}}AFX MSG
83.
           {\tt afx\_msg\ LRESULT\ OnGraphNotify(WPARAM\ inWParam,\ LPARAM\ inLParam);}
84.
          DECLARE_MESSAGE_MAP()
85.
86.
87.
      //{{AFX_INSERT_LOCATION}}
88.
      // Microsoft Visual C++ will insert additional declarations immediately before the previous line.
89.
      #endif // !defined(AFX_SIMPLEPLAYERDLG_H__3599FE35_3322_4CC7_B30B_6D6050C2EDFF__INCLUDED_)
90.
```

从头文件来看,和普通的MFC对话框类并没有什么不同,无非是一些消息响应函数,或者MFC控件对应的类。需要注意一下,有一个变量:

```
1. CDXGraph * mFilterGraph
```

接下来看看CSimplePlayerDlg函数的实现部分吧。 OnButtonOpen():打开媒体文件按钮的响应函数

```
[cpp] 📳 📑
      //打开
1.
      void CSimplePlayerDlg::OnButtonOpen()
2.
3.
      {
         // TODO: Add your control notification handler code here
4.
5.
          CString
                   strFilter = "AVI File (*.avi)|*.avi|";
      strFilter += "MPEG File (*.mpg;*.mpeg)|*.mpg;*.mpeg|";
6.
          strFilter += "Mp3 File (*.mp3)|*.mp3|";
7.
      strFilter += "Wave File (*.wav)|*.wav|";
8.
9.
          strFilter += "All Files (*.*)|*.*|";
10.
      CFileDialog dlgOpen(TRUE, NULL, NULL, OFN_PATHMUSTEXIST | OFN_HIDEREADONLY,
11.
              strFilter, this);
12.
      if (IDOK == dlgOpen.DoModal())
13.
14.
              mSourceFile = dlgOpen.GetPathName();
15.
              // Rebuild the file playback filter graph
             //创建Graph
16.
17.
              CreateGraph():
18.
19.
```

其中CreateGraph()函数如下所示:

```
[cpp] 📳 👔
      //创建Graph
2.
      void CSimplePlayerDlg::CreateGraph(void)
3.
      {
4.
         //(如果有)销毁Graph
5.
          DestroyGraph();
         //新建一个核心类
6.
          mFilterGraph = new CDXGraph();
7.
      if (mFilterGraph->Create())
8.
9.
10.
             // Render the source clip
11.
              mFilterGraph->RenderFile(mSourceFile);
12.
              // Set video window and notification window
13.
              mFilterGraph->SetDisplayWindow(mVideoWindow.GetSafeHwnd());
14.
              mFilterGraph->SetNotifyWindow(this->GetSafeHwnd());
15.
              // Show the first frame
16.
              mFilterGraph->Pause();
17.
          }
18.
```

与CreateGraph()相反的还有一个DestroyGraph()

```
[cpp] 📳 📑
      //(如果有)销毁Graph
2.
      void CSimplePlayerDlg::DestroyGraph(void)
3.
4.
         if (mFilterGraph)
5.
              // Stop the filter graph first
6.
7.
              mFilterGraph->Stop();
             mFilterGraph->SetNotifyWindow(NULL);
8.
9.
10.
             delete mFilterGraph;
11.
              mFilterGraph = NULL;
12.
13.
```

OnButtonPlay():播放按钮的响应函数

```
[cpp] 📳 🗿
      //播放
1.
2.
      void CSimplePlayerDlg::OnButtonPlay()
3.
4.
         if (mFilterGraph)
5.
              mFilterGraph->Run();
              // Start a timer
8.
              if (mSliderTimer == 0)
9.
              {
                  mSliderTimer = SetTimer(SLIDER TIMER, 100, NULL);
10.
11.
12.
13.
```

OnButtonPause(): 暂停按钮的响应函数

```
[cpp] 📳 👔
      void CSimplePlayerDlg::OnButtonPause()
1.
2.
3.
          if (mFilterGraph)
4.
5.
             mFilterGraph->Pause();
6.
            // Start a timer
              if (mSliderTimer == 0)
8.
9.
                 mSliderTimer = SetTimer(SLIDER_TIMER, 100, NULL);
10.
11.
          }
12. }
```

OnButtonStop():停止按钮的响应函数

```
[cpp] 📳 📑
1.
      void CSimplePlayerDlg::OnButtonStop()
2.
          if (mFilterGraph)
3.
4.
              {\tt mFilterGraph->SetCurrentPosition(0);}
5.
            mFilterGraph->Stop();
6.
              // Stop the timer
8.
             if (mSliderTimer)
9.
10.
                  KillTimer(mSliderTimer);
11.
                  mSliderTimer = 0;
12.
13.
          }
14.
```

其他的函数不再一一列举,但意思都是一样的。
