Ø OpenCV提取显示一张图片(或者视频)的R,G,B颜色分量

2014年02月11日 00:28:33 阅读数:13598

使用OpenCV可以提分别提取显示一张图片(或者视频)的R,G,B颜色分量。效果如下。

原图:

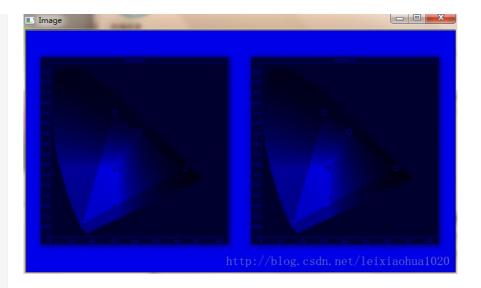

R:

G:

示例代码如下,貌似很久以前网上找的的,逻辑很清晰,就是把R,G,B三个分量分开,然后显示出来,就不注释了。

```
[cpp] 📳 📑
      #include "cv.h"
2.
      #include "highgui.h"
3.
      #include <cxcore.h>
4.
5.
6.
      void main(int argc,char **argv)
7.
8.
          IplImage *img=cvLoadImage("test.bmp",1);
9.
          IplImage *channel_r=cvCreateImage(cvGetSize(img),IPL_DEPTH_8U,1);
          {\tt IplImage *channel\_g=cvCreateImage(cvGetSize(img),IPL\_DEPTH\_8U,1);}
10.
11.
          IplImage *channel_b=cvCreateImage(cvGetSize(img),IPL_DEPTH_8U,1);
12.
          IplImage *img_r=cvCreateImage(cvGetSize(img),IPL_DEPTH_8U,3);
13.
          IplImage *img_g=cvCreateImage(cvGetSize(img),IPL_DEPTH_8U,3);
14.
         IplImage *img_b=cvCreateImage(cvGetSize(img),IPL_DEPTH_8U,3);
15.
16.
              cvSplit(img,channel b,channel g,channel r,NULL);
17.
          cvMerge(channel_b,0,0,0,img_b);
18.
      cvMerge(0,channel_g,0,0,img_g);
19.
          cvMerge(0,0,channel_r,0,img_r);
20.
          cvNamedWindow("ImageOrigin",CV WINDOW AUTOSIZE);
21.
          cvNamedWindow("Image_R",CV_WINDOW_AUTOSIZE);
22.
          {\tt cvNamedWindow("Image\_G",CV\_WINDOW\_AUTOSIZE);}
23.
          cvNamedWindow("Image_B",CV_WINDOW_AUTOSIZE);
24.
25.
          cvShowImage("ImageOrigin",img);
26.
          cvShowImage("Image_R",img_r);
27.
          cvShowImage("Image_G",img_g);
28.
          cvShowImage("Image_B",img_b);
29.
30.
      cvSaveImage("img_red.bmp",img_r);
          cvSaveImage("img green.bmp",img g);
31.
32.
      cvSaveImage("img_blue.bmp",img_b);
33.
34.
          cvWaitKev(0):
35.
          cvReleaseImage(&img);
          cvReleaseImage(&img_r);
36.
37.
          cvReleaseImage(&img_g);
          cvReleaseImage(&img_b);
38.
39.
          cvDestroyAllWindows();
40.
```
